Art Unit: 1712

The International Bureau Provided the PCT priority document, but not the Japanese priority document.

This application contains claims directed to the following patentably distinct species of the claimed invention: various compositions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3 and 12-14 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Elect a single composition. Some examples of proper elections are:

Art Unit: 1712

Pulverized (polycarbonate + polyester) + polycarbonate

or

Pulverized (polycarbonate + siloxane) + polycarbonate

or

Pulverized (polycarbonate + styrenic resin + phosphoric ester) + polycarbonate

The claims lack unity of invention because the generic claim 1 can be rejected over the three Nodera references. Each discuss recyclability and moisture resistance (analogous to wet heat retention) of polycarbonate compositions. If the generic claim is unpatentable, then there is no common special technical feature linking the claims (see MPEP 1893.03(d); Annex B of Administrative Instructions Under the PCT).

A telephone call was made to Roger Hahn on 1/13/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Buttner whose telephone number is 703-308-2403. The examiner can normally be reached on Weekdays from 10:00 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Dawson can be reached on 703-308-2340.
